

Patient Care Signs

Inform. Communicate. Engage.

Consider the Benefits:

- Reduce associated infections
- Enhance patient safety
- Decrease the likelihood of communication errors
- Increase patient and caregiver engagement
- Improve patient care and outcomes

TAYLOR[™]
HEALTHCARE

Improve Patient Safety and Satisfaction

Sadly, 80 percent of adverse events are a result of a breakdown of communication somewhere along the continuum of care. One vital way leading organizations are reducing communication errors is with Patient Care Signs.

Patient Care Signs by Taylor Healthcare offer a functional and aesthetically pleasing way to inform doctors, nurses, staff and visitors about critical patient information and assure proper precautions are taken. In addition, these care signs are American Disabilities Act (ADA) compliant and fully customizable to meet the requirements of your facility, department or unit.

A Durable, Customizable Design

Patient Care Signs by Taylor Healthcare are designed to be placed on the wall outside of a patient's room. The sign is equipped with a durable design, customizable slide-and-lock information tabs, and simple precaution inserts that streamline communication and help reduce errors.

Consider the Convenience

- Lock and unlock information tabs with one hand.
- Change critical information with a patented, push-and-slide system.
- Combine room identification, critical patient status information and infectious disease control inserts into a single system.

Enhance Communication, Achieve Goals

Taylor Healthcare's Patient Care Sign is a cost-effective tool for institutions to achieve their National Patient Safety Goals. Placard inserts have been designed to empower healthcare organizations to achieve specific goals.

National Patient Safety Goals (NPSG's)*

- Goal 1: Improve the accuracy of patient identification.

- Goal 2: Improve the effectiveness of communication among caregivers.

- Goal 3: Improve the safety of using medications.

- Goal 7: Reduce the risk of health care-associated infections.

- Goal 9: Reduce the risk of patient harm resulting from falls.

- Goal 15: The organization identifies safety risks inherent in its patient population.
